

Project 25

KWIEC Review Process for CY 2010

Note: For federal and state funded projects - all new wireless voice communications systems must meet the minimum KWIEC standards for operation. Currently these are:

1. Systems must be Narrowband compliant (12.5 KHz bandwidth)
2. Systems must have a minimum of 32 programmed channels available
3. Systems must be programmed with the Voice Mutual Aid frequencies

For locally funded projects -agencies are encouraged to deploy P-25 assets.
